SUMMARY

Duck Creek Policy technical specialist with 8+ years of experience in packaged application development, specializing in Duck Creek Policy development and production support. Strong hands-on expertise in .NET development and Duck Creek integrations, delivering complex insurance solutions across multiple lines of business. Experienced Team Lead with a proven ability to support Agile delivery and collaborate effectively with cross-functional teams. Microsoft Certified: Azure Fundamentals and Duck Creek Policy Developer Certified.

EXPERIENCE

01/2021

Team Lead

Accenture

Worked as a Duck Creek Policy Developer on Commercial Auto Manuscript, delivering enhancements and defect fixes using Agile methodology. Played a key role in understanding client requirements and implementing complex Michigan state-specific per-bind functionality. In parallel, led a 15-member team providing production support for a SaaS environment managing 30+ applications, facilitating coordination between business users, vendors, and stakeholders while ensuring adherence to ITSM processes. Fostered a collaborative team environment that improved engagement and operational efficiency.

01/2019 - 01/2021

Developer

Capgemini

Led the successful transition of Duck Creek Policy production support from an incumbent vendor, ensuring smooth knowledge transfer and system stability. Provided end-to-end development and production support for a Duck Creek Policy application supporting the Umbrella line of business, working extensively with 15+ system integrations. Managed application maintenance, minor enhancements, bug analysis, and defect fixes across the policy lifecycle. Supported an environment processing 300+ daily transactions while consistently meeting SLAs and maintaining high system availability.

01/2017 - 01/2019

Developer

Accenture

Worked on ASP .NET development to integrate Duck Creek out-of-the-box systems with third-party payment gateways using batch scripts. Contributed to bug fixes and enhancements for the MVC-based Unified Front End (UFE) application and developed components within the Asset Integration Layer (AIL). Created Custom Business Objects (CBOs) as part of an Accenture internal initiative to build a reusable CBO library, enabling faster and standardized integration of third-party services.
